**How to Estimate Lake or Pond Size:**

Measure Length (L), Width (W) and average Depth (D) in FEET. Then multiply for:

Square shaped bodies of water:  
 $L \times W \times D \times 7.5 =$  approximate gallons

Circular or Elliptical bodies of water:  
 $L \times W \times D \times 5.9 =$  approximate gallons

Total gallons divided by 325,851.6 (gallons per acre foot) = Acre Feet

**Storage:** Store in a dry, cool place. Keep out of direct sunlight. Do not freeze.

**Directions:** Calculate the amount needed using the chart below.

For best results mix 50 parts water with one (1) part F-55 BIO ZYME. Spray entire surface area of water or sprinkle around the edges of the shoreline or in moving water.
