formula F-X NIGHT SHADE

General Information: F-X NIGHT SHADE is a unique blend that will screen UV rays, while restoring discolored water and giving it a natural mirror-like appearance. It is environmentally safe and non-toxic. Use F-X NIGHT SHADE wherever discoloration is a problem. Mix F-X NIGHT SHADE with F-40 ENVIRO BLUE for a gun metal blue.

How to Estimate Lake or Pond Size:
Measure Length (L), Width (W) and average Depth (D) in FEET. Then multiply for:

Square shaped bodies of water:
 $L \times W \times D \times 7.5 =$ approximate gallons

Circular or Elliptical bodies of water:
 $L \times W \times D \times 5.9 =$ approximate gallons

Total gallons divided by 325,851.6 (gallons per acre feet) = Acre Feet

Directions: Apply F-X NIGHT SHADE directly into the water to be treated. Generally one ounce (1 oz) will treat 10,000 gallons of water and one quart to 1/2 gallon of F-X NIGHT SHADE will treat one surface acre 3-4 feet deep.

Notice: Neither the manufacturer nor seller make any warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use of this material when such use is contrary to label instruction. Read and follow the label directions carefully.
